

Questions

1. What is your stance regarding AI being implemented in Education settings?
2. Do you use AI in when your working?
3. What do you think will AI impact more in the future in terms of jobs?
4. How useful is AI in your life?
5. What do you think are the cons or issues you have of AI in education or work settings?

1. Stance on AI in Education:

- ◆ I see AI as equivalent to calculators in education. Assignments will need redesigning, knowing students can use AI, but this allows for more critical thinking and complex workloads. While AI can answer basic questions, it often produces superficial answers that "fit" a prompt without truly addressing it. Exams remain crucial for testing genuine student knowledge.

2. AI Usage in Work:

- ◆ I use AI when working, viewing it as an improved Google 2.0. It efficiently filters information, providing content in an easily digestible format upon request.

3. AI's Future Impact on Jobs:

- ◆ I believe the impact of AI on jobs is currently overblown in terms of "taking over the world." However, increased use of AI for productivity improvement will likely intensify competition, as those not utilizing AI may fall behind. This boost in productivity could potentially lead to reduced hiring needs.

4. AI's Usefulness in Personal Life:

- ◆ AI is very useful in my life, serving various purposes from information gathering to task assistance.

5. Cons/Issues with AI in Education/Work:

- ◆ Key issues include:
 - ◆ AI's potential to hallucinate and generate misinformation, necessitating critical thinking to discern accuracy.
 - ◆ In education, overreliance on AI can hinder actual learning. It's crucial to use AI as a learning aid rather than a work substitute.
 - ◆ The risk of becoming overly dependent on AI, potentially diminishing certain skills or problem-solving abilities.
